## 2 List of Abbreviations

App.	Appendix
CH	Switzerland
CL	Checklist
CTD	Common Technical Document
DMF	Drug Master File
DTD	Document Type Definition
eCTD	electronic Common Technical Document
EMA	European Medicines Agency
EU	European Union
FDA	Food and Drug Administration
FO	Form
GMO	Genetically Modified Organisms
GMP	Good Manufacturing Practice
ICH	International Conference on Harmonisation
INN	International Non-proprietary Name
LoQ	List of Questions
TPA	Federal Law on Medicinal Products and Medical Devices (Therapeutic Products Act)
N/A	Not Applicable
PSUR	Periodic Safety Update Report
SIMES	Solutions for the Implementation and Management of Electronic Submissions
SmPC	Summary of Product Characteristics
TSE	Transmissible spongiform encephalopathy
XML	Extensible Markup Language

## 3 Introduction

This document specifies Module 1 for the submission of an electronic Common Technical Document (eCTD) in Switzerland.

eCTD is the only valid format for electronic-only submissions to the Swiss Agency for Therapeutic Products (Swissmedic).

The focus of the specification is to provide the ability to transfer the application electronically from industry to Swissmedic. Industry to industry, Swissmedic to other agencies, other agencies to Swissmedic and Swissmedic to industry transfer is not addressed.

This document should be read together with the ICH eCTD Specification to prepare a valid eCTD submission in Switzerland. The latest version of the ICH eCTD Specification can be found at: <http://estri.ich.org/ectd>.

## 4 Swiss Module 1: Specific Information

The ICH Common Technical Document (“CTD”) specifies that Module 1 should contain region-specific administrative and product information.

Depending on the type of application, region-specific administrative and product information has to be provided in Module 1.

Appendix 1 gives a detailed overview of all the possible documents in Module 1. Depending on the type of application, the phase of the application (e. g. initial submission, responses to questions) and the type of product (e.g. oral galenic form, vaccine) not all elements are to be provided. The current practice has to be taken into account. The table includes all application types although some of them may only become suitable for eCTD submission at a later stage. Please refer to the Swiss Guidance for Industry on Providing Regulatory Information.

## 5 Swiss File Formats

The file formats that can be included in Module 1 are given in table 1. Pdf, as defined by the ICH eCTD Specification, is the only format routinely acceptable – see table. Other formats may be accepted eg. XML, image and archive, but are not recommended. If a submission containing these formats is envisaged, please liaise with Swissmedic before submission. For further clarification please refer to the Q&A document. Note that all pdf files included in an eCTD (irrespective of the module) should be v1.4, v1.5, v1.6 or PDF v1.7.

**Table 1 Acceptable file formats for Module 1**

Document	File Format	Remark
Cover letter	pdf	Scanned document with the original signature is mandatory.
Administrative forms	pdf	Scanned documents with the original signature are mandatory.
Product information text: Draft packaging material or mock-ups	pdf pdf	Include working documents as word (.doc or .docx, please refer to the guidance document) in addition to the pdf for the product information, for ease of review.*
Other	pdf	pdf preferably generated from electronic source.

\*For the correct naming of the files please refer to the Swiss Guidance for Industry on Providing Regulatory Information

In addition, the pdf files should follow the general ICH requirements of Modules 2 to 5 regarding size limitations, security settings/password protection etc. Files, folders or submissions should not be zipped.

## 6 General Conventions Using Module 1

### 6.1 Use of Electronic Signatures

In future, the use of advanced electronic signatures (digital signatures) will be crucial in achieving pure electronic communication between the pharmaceutical industry and regulatory agencies, particularly for authentication of electronic submissions and documents contained therein. However, currently, the use of digital signatures for electronic submissions is not supported and digital signatures should therefore not be used. A document containing e-signatures will be accepted, but the e-signature will be ignored.

Scanned signatures in the electronic Module 1 are allowed since paper copies of certain documents of Module 1 including the original signed versions of the forms and the cover letter are required (please refer to the Guidance for Industry on Providing Regulatory Information in eCTD Format for further details).

The cover letter should include an attestation that the paper and electronic versions of the forms, the product information and the cover letter are identical (see Swiss Guidance for Industry on Providing Regulatory Information in eCTD Format).

### 6.2 Links

Links among objects in the eCTD submission should be relative. The intention is to make the eCTD submission self-contained.

Links among objects in Module 1 are allowed. Hyperlinks from Module 1 to other modules are allowed. The product information and the "Form pharmaceutical information for parenteral preparations" require a logical display of the references in the paper document. For detailed requirements please refer to the Swiss Guidance for Industry on Providing Regulatory Information.

### 6.3 Handling of Empty or Missing eCTD Sections

For new applications (including generic applications), detailed statements justifying the absence of data or specific CTD sections should be provided in the relevant Quality Overall Summary and/or Non-Clinical/Clinical Overviews (Module 2.3, 2.4, 2.5). Note that placeholder documents highlighting 'no relevant content' should not be placed in the eCTD structure, as these would create a document lifecycle for non-existent documents, and unnecessary complication and maintenance of the eCTD. If relevant, justification for empty sections in Module 1 is to be provided in the cover letter.

## 7 General Architecture of Module 1

The Swiss Module 1 architecture is similar to that of Modules 2 to 5 of the eCTD, comprising a directory structure and a backbone with leaves. The backbone must be a valid XML document according to the Swiss Document Type Definition (DTD). The backbone (the ch-regional.xml file) contains meta-data for the leaves, including pointers to the files in the directory structure. In addition, the Swiss DTD defines meta-data at the submission level in the form of an envelope. The root element is “ch-backbone” and contains two elements: “ch-envelope” and “m1-ch”.

The CH DTD is modularised, i.e. the envelope and leaves are referenced from the main part of the DTD as external entities called respectively "ch-envelope.mod" and "ch-leaf.mod". The CH "leaf" is identical to the leaf element described in the ICH eCTD DTD; reference is made to Table 6-8 of the ICH eCTD Specification. A full description of the CH DTD can be found in Appendix 5 of this specification.

Appendix 3 of this specification shows a screenshot of the eCTD structure displayed by an XML viewing tool. The leaves need to be equipped with information according to the requirements for a given type of application. The leaf titles should be short and meaningful.

Note that files can be referred to across modules i.e. content files in Modules 2 to 5 (in the index.xml) can be referred to from the ch-regional.xml (Module 1) and vice versa.

The eCTD contains more than documents and requires the applicant to deliver technical information such as the DTD, the MD5 checksum, additional meta data, and other information. A list of files that are required by Swissmedic in addition to the documents is as follows:

Top level folder:

- index.xml: eCTD backbone file, the table of content
- index-md5.txt the MD5 checksum file

Util folder:

- dtd folder File folder for document type definition files
- style folder File folder for style sheet

DTD folder:

- ch-envelope.mod
- ch-leaf.mod
- ch-regional.dtd Swissmedic regional DTD
- ich-ectd-3-2.dtd ICH DTD

Style folder:

- ch-regional.xsl Swiss regional style sheet file
- ectd-2-0.xsl ICH style sheet file

Other file formats such as .doc or .docx may be required in addition to the PDF requirement of the eCTD.

These files should not be added as leaf elements (documents) within the eCTD structure. They should be provided in a separate folder called “<eCTD sequence>-workingdocuments” (e.g.

0000-workingdocuments), on the CD/DVD containing the eCTD. Please refer to the Guidance for Industry on Providing Regulatory Information for guidance on the structure of this folder.

## 7.1 Envelope

The “ch-envelope” element is designed to be used for all types of applications (initial, variations, etc.) for a given medicinal product and will mainly be used for the initial processing at the agency level. The envelope provides meta-data at the submission level. A description of each “envelope” element is provided in Appendix 2 of this specification.

## 7.2 m1-ch

The “m1-ch” element of the Swiss DTD is based on the same conceptual approach as the common part of the ICH eCTD DTD. It provides an XML catalogue with meta-data at the leaf level including pointers to the location of files in a directory structure. As for the ICH eCTD DTD, the “m1-ch” element maps to the directory structure.

## 7.3 Directory / File Structure

The Swiss Module 1 Specification provides a directory and highly recommended file structure (see Appendix 1).

## 7.4 Node Extensions

Node extensions are a way of providing extra organizational information to the eCTD. The node extension should be visualized as an extra heading in the CTD structure. The following rules apply to node extensions in Swiss eCTDs:

- Node extensions must not be used where ICH-specified sub-headings already exist (e.g. indication, manufacturer, drug substance, drug product are all-ICH specified node extensions).
- Node extensions must only be used at the lowest level of the eCTD structure (for example a node extension can be used at the level 5.3.5.1 but must not be used at the level 5.3).
- Node extensions should be used to group together documents made up of multiple leaf elements (e.g. a clinical study made up of separate files for the synopsis, main body and individual appendices) Please refer to the Guidance for Industry on Providing Regulatory Information for further information.
- Node extensions must be maintained over the entire life of the eCTD lifecycle (for example if a node extension is used in eCTD Sequence 0000 to group files for a study report in Module 5.3.5.1, then any files submitted in a later eCTD Sequence must also be placed under a node extension, even if only one file is submitted).

Node extensions may be nested as this is allowed by the eCTD DTD. However, as noted in bullet 2, the first node extension must be at the lowest level in the eCTD structure (e.g. in Module 5.3.7 a node extension may be added to group together files with the Study Identifier as Title attribute). Further node extensions may be added as children of the Study Identifier node, separating CRFs from individual patient listings.

## 7.5 File Naming Convention

File names have fixed and variable components. Components are separated by a hyphen. No hyphens or spaces should be used within each component.

Fixed components are highly recommended. The variable component is optional and should be used as appropriate to further define these files. The variable component, if used, should be a meaningful concatenation of words without separation and should be kept as brief and descriptive as possible. File extensions in line with this specification should be applied as applicable.

The first component in a file name of a Swiss specific document should be the country code of Switzerland ("ch"). Documents which are not Swiss-specific do not need this country code to allow re-use of these files for other submissions in other countries without re-work. The second component should be the document type code, as per Appendix 1, Table 3. A variable third element can be added if needed. In cases where differentiation is needed (for example between 1.5mg and 15mg), it is suggested that the word 'point' is written in full i.e. '1point5mg'.

There are no recommendations for variable components in this specification. The format of the file is indicated by the file extension. File names should always be in lowercase, in line with the ICH eCTD Specification. For more details see Appendix 1, Tables 1 and 4

Examples:

- ch-cover.pdf
- ch-fofulldecl.pdf
- nn-gmpcert.pdf
- ch-responses-quality.pdf
- ch-packaging-tablet10mg.pdf

## 8 Change Control

The Swiss Module 1 Specification is likely to change with time. Factors that could affect the content of the specification include, but are not limited to:

- Change in the content of the Module 1 for the CTD, either through the amendment of information, at the same level of detail, or by provision of more detailed definition of content and structure
- Change to the regional requirements for applications that are outside the scope of the CTD
- Update of standards that are already in use within the eCTD
- Identification of new standards that provide additional value for the creation and/or usage of the eCTD
- Identification of new functional requirements
- Experience of use of the eCTD by all parties, in particular Module 1.

Please refer to the change control process outlined in the Q&A document.

## 9 Appendices

### Appendix 1: Directory / File Structure for Module 1

The following table gives an overview on the contents of Module 1. The current practice has to be taken into account to define which documents are needed according to the application types, and the documents listed below should be provided where applicable. Please refer to the TPA, the related ordinances and the Swiss Guidance for Industry on Providing Regulatory Information to identify which documents need to be included in the submission.

File names have fixed and variable components. Components are separated by a hyphen. No hyphens or spaces should be used within individual components.

The fixed components are defined in the table below. A filename is composed as follows: cc-fixedcomponent-variablecomponent.ext, where cc is used as a placeholder for the country code (see also table 3). For each leave described below node extensions are allowed.

Product lifecycles with more than one galenic form contain a common folder in Module 1. Table 1 provides guidance on whether specific documents can be shifted from the galenic form folder to the common folder while introducing a second galenic form. In this case the documents located in the galenic form folder should be deleted (operator is “delete”) and added in the common folder (operator is “new”). Furthermore, table 1 provides guidance regarding the use of operators in life cycle management.

Table 1: Overview on the content of the Swiss Module 1 and their operations in follow-up submissions:

No	Title	Fixed Component of File Name	Possible shift to the folder “common” in M1 with 2 <sup>nd</sup> galenic form	Life Cycle Operator on Document Level
1.0	Cover Letter	cover	-	New
1.2	Application for Marketing Authorisation and Variation			
1.2.1	Form Application for Marketing Authorisation and Variation	foapplvar	-	New
1.2.2	Annexes - Forms			
1.2.2.1.	Form Full Declaration	fofulldecl	-	Replace*
1.2.2.2	Form Manufacturer Information	fomanufacturer	-	Replace*

No	Title	Fixed Component of File Name	Possible shift to the folder "common" in M1 with 2 <sup>nd</sup> galenic form	Life Cycle Operator on Document Level
1.2.2.3	Form Status Marketing Authorisations Abroad	fostatusma	-	New or Replace**
1.2.2.4	Form Variations Requiring Notification	fovarnotif	-	New
1.2.2.5	Form Variations Requiring Authorisation (Quality)	fovarauthor	-	New
1.2.2.6	Form Application for Renewal of Marketing Authorisation	forenewal	-	New
1.2.2.7	Form Human Blood Components	fohumanblood	-	Replace*
1.2.2.8	Form Substances of Animal and Human Origin	foanimalhuman	-	Replace*
1.2.2.9	Form Pharmaceutical Information for Parenteral Preparations	fopharminfo	-	Replace*
1.2.2.10	Form Co-Marketing Confirmation	focomarketing	-	Replace (will probably never occur)*
1.2.2.11	Form Import According to Paragraph 14 Section 2 TPA	foparagraph14	-	New or Replace**
1.2.2.12 <sup>++</sup>				
1.2.2.13	Form Change of Marketing Authorisation Holder	fochangemah	-	New
1.2.2.14	Checklist Content Validation eCTD	clcontentval	-	New
1.2.2.15	Checklist Content Validation eCTD Paragraph 13 TPA	clparagraph13	-	New
1.2.2.16	Form PSUR for Human Medicinal Products	fopsur	-	New
1.2.2.17	Form Declaration Radiopharmaceuticals	foradio	-	Replace*
1.2.2.18	Form Confirmation Substances from GMO	fogmo	-	Replace *
1.2.2.19	Form DMF for First Authorisation and Variations	fodmf	-	New
1.2.2.20	Form Information on Product Quality (Paragraph 13 TPA)	foparagraph13	-	Replace*
1.2.2.21	Form Notification Sample Packages	fonosample	-	New or Replace**
1.2.2.22	Form Notification of No Marketing or Interruption to Distribution	fonomarintidis	-	Replace*
1.2.2.23	Form Application for Recognition of Orphan Drug Status	forecogorphan	-	New
1.2.2.24	Application for Recognition of Fast Track Status	recogfasttrack	-	New
1.2.2.99	Other Forms [extensional sections allowed]	foother	-	

No	Title	Fixed Component of File Name	Possible shift to the folder "common" in M1 with 2 <sup>nd</sup> galenic form	Life Cycle Operator on Document Level
1.2.3	Annexes - Documents on Drug Product Quality			
1.2.3.1	DMF Letter of Access	dmfletter	X	New
1.2.3.2	Ph. Eur. Certificate of Suitability for Active Substance	cosas	X	New or Replace**
1.2.3.3	Ph. Eur. Certificate of Suitability for TSE	costse	X	New or Replace**
1.2.3.4	EMA Certificate for Plasma Master File (PMF)	emacertpmf	X	New or Replace**
1.2.3.5	EMA Certificate for Vaccine Antigen Master File (VAMF)	emacertvamf	X	New or Replace**
1.2.4	Annexes – Manufacturing			
1.2.4.1	GMP Certificate or Other GMP Documents	gmpcert	X	New or Replace**
1.2.4.2	Documentation Concerning Manufacturing Authorisation	docmanuf	X	Replace*
1.2.4.3	Complete Manufacturing Information with Flow Chart	manufflowchart	-	Replace*
1.2.4.4	Confirmation on GMP Conformity	gmpconform	-	New
1.2.5	Annexes – Others			
1.2.5.1	Comparison of Approved Information for Professionals with EU SmPC (for PSURs)	smpcprofcompar	-	Replace*
1.2.5.2	Company Core Data Sheet (for PSURs)	ccds	X	Replace*
1.3	Product Information and Packaging Material			
1.3.1	Information for Professionals	prof	X	New or Replace*
1.3.2	Patient Information	patient	X	New or Replace**
1.3.3	Packaging Information	packaging	-	Replace*

1.4.	Information About the Expert			
1.4.1	Quality	quality	X	New
1.4.2	Nonclinical	nonclinical	X	New
1.4.3	Clinical	clinical	X	New
1.5	Data of Bioavailability Studies (Generics)			

No	Title	Fixed Component of File Name	Possible shift to the folder "common" in M1 with 2 <sup>nd</sup> galenic form	Life Cycle Operator on Document Level
1.5.1	Swissmedic Bioequivalence Trial Information Form <sup>+</sup>	bioequivalence	-	New
1.5.2	Documents on the Reference Product	bioreference	-	New
1.5.3	Confirmation of Identity of Submitted Product and Reference Product Used in the Bioequivalence Studies	confidbioeq	-	New
1.6	Environmental Risk Assessment			Replace*
1.6.1	Non-GMO	nongmo	X	Replace*
1.6.2	GMO	gmo	X	Replace*
1.7	Decision of Foreign Authorities			
1.7.1	Responses to LoQ	responses	-	New
1.7.2	Assessment Report	ar	-	New
1.7.3	EU Decision	eudecision	-	New
1.7.4	FDA Decision	fdadecision	-	New
1.7.5	Decision of Other Foreign Authorities	decisionothers	-	New
1.7.6	Paragraph 13 Additional Documentation	par13addoc	-	New or Replace**
1.8	Information Relating to Pharmacovigilance			
1.8.1	Pharmacovigilance System	phvigsystem	X	Replace*
1.8.2	Risk Management System	riskmgtsystem	X	Replace*
1.9	Fast Track Status Decision	fasttrack	-	New
1.10	Information Related to Paediatrics	paediatrics	-	Replace*
1.11	Orphan Drug Status Decision	orphandrug	X	New
	Responses to Swissmedic LoQ	responses	-	New
	Additional Information	additionalinfo	-	New or Replace**

\*the first time a document is integrated into the eCTD, the operator will always be "new". Throughout the life-cycle, the operator should be "replace".

\*\* if different documents are integrated in parallel into the eCTD for the first time, the operator for each of them will be "new"; changes to one specific document throughout the life-cycle require the operator "replace",

+ alternatively the information can be submitted in european format as described in the Guideline on the Investigation on Bioequivalence (CPMP/EWP/QWP/1401/98 Rev.1, App.IV)

\*\* This form is no longer applicable. The folder remains for life cycle maintenance.

The directory / file structure is defined in this appendix as a table containing the following information:

Table 2

Sequential number		Each item in the table has a unique sequentially assigned reference number. These reference numbers can change with each version of this appendix.
	Number	CTD section number
	Title	CTD title
	Element	Element name in the CH backbone
	File - Directory	File - Directory name from m1/ch – should be a relative path from ch/m1 e.g. 10-cover/ch-cover.pdf. This is consistent with ICH standards. The file extension corresponds to the file type; i.e. the “pdf” extension is only illustrative.
	Comment	Comments

Where the following conventions are used:

Table 3

<b>Codes*</b>	<b>Definition</b>
CC **	Country code
FIXED	Fixed component of the filename (see table 1)
VAR *	Variable component of the filename.
EXT	File extension, usually pdf
DDDD	A eCTD Sequence number made of 4 digits (e.g. 0000)
galenic-form common	Placeholder for either the dosage form-specific folder or the common folder

\* The names of the actual files and directories used should be presented in lower case in accordance with the eCTD specification. The use of upper case for codes is for illustrative purposes only to show differentiation between the variable parts and the fixed part of the name.

The variable component, when used, should be a logical name and preceded by a hyphen. The variable component itself must not contain a hyphen or spaces itself, e.g. ch-foapplvar-tablets10mg.pdf.

When only one component is submitted in a directory, it is recommended that there is no variable component in the filename. F. ex. when only the cover letter is submitted in the directory, the file name should be ch-cover.pdf.

\*\* CC is used as a placeholder when a document is not Swiss-specific, but is assigned to a specific country (for example ema-certpmf.pdf). For Swiss-specific documents CC is replaced by ch (for example ch-forenewal.pdf). For documents not assigned to a specific country, cc is replaced by common (for example common-gmpcert.pdf, see table 4). For the countries the relevant ISO-3166-alpha-2 country code has to be used. Exceptions: If the “country” is EU, ema or emea as country code can be used. For United Kingdom, uk and for Greece, el can be used.

Table 4: Directory / File Structure for Swiss Module 1

A separate folder structure should be created for each galenic form. The term „galenic-form“ is used as a placeholder for the term of the galenic form. It is highly recommended that the English terms defined in the EU standard terms are used. For the folder covering documents of all dosage form, “galenic-form” is replaced by “common” Please refer also to Table 1 in Appendix 1 and Appendix 2. A document should only be placed under the common node if it is applicable to all dosage forms. (For further information regarding Granularity and Life Cycle Management see Guidance for Industry on Providing Regulatory Information, chapters 3 and 5.). Currently a cover letter is mandatory for every submission; its location in the folders “galenic form” or “common” depends on the galenic forms covered by the submission.

1	Number	
	Title	
	Element	
	File	m1/ch/ch-regional.xml
	Comment	The Swiss Regional XML instance including the envelope information. Note that the operation attribute for the ch.regional.xml should always be set to 'new'.
2	Number	
	Title	Module 1 CH
	Element	m1-ch
	Directory	m1/ch/
	Comment	Top level directory for the Swiss Module 1 as per ICH eCTD Specification

3	Number	
	Title	Galenic Form
	Element	m1-galenic-form
	Directory	m1/ch/galenic-form
	Comment	The galenic form should be included in the file path e.g. tablet, capsule etc. The M1 directory structure should be provided with each galenic form. For example, tablets, with all relevant m1 sub-directories, followed by capsules, with all relevant sub-directories. Where files are shared between all galenic forms a 'common' directory should be created with all relevant sub-directories. The name of the galenic form should be provided according to EU standard terms (e.g. tablets, capsules) It is highly recommended that the denomination of the galenic form is identical in the envelope and for the files. A self-explanatory abbreviation can be used. Attributes and folder name need not to be similar.
4	Number	1.0
	Title	Cover Letter
	Element	m1-0-cover
	Directory	m1/ch/galenic-form/10-cover
	Comment	
5	Number	1.0
	Title	Cover Letter
	Element	m1-0-cover
	File	m1/ch/galenic-form/10-cover/ch-cover-VAR.EXT
	Comment	Filename for the Cover Letter composed of a fixed component "ch", a fixed component "cover" and an optional variable component if required (e.g. ch-cover-variationrationale.pdf). When only the cover letter is submitted in this directory it is recommended that the file name is ch-cover.pdf.
6	Number	1.2
	Title	Application for Marketing Authorisation and Variation
	Element	m1-2-applvar
	Directory	m1/ch/galenic-form/12-foapplvar
	Comment	
7	Number	1.2.1
	Title	Form Application for Marketing Authorisation and Variation
	Element	m1-2-1-foapplvar
	Directory	m1/ch/galenic-form/12-foapplvar/121-foapplvar

## Appendix 2: Envelope Element Description

The “ch-envelope” element is the root element that defines meta-data of the submission. All envelope elements are mandatory.

element	attribute	Description/Instruction	example	occurrence
ch envelope		root element that provides meta-data of the submission		unique
envelope	country	Parent element for the submission meta-data. This element must be “ch” (case sensitive).	ch	unique
application number (“Gesuchs-ID”)		Number assigned to the applicant by Swissmedic, not known before initial submission, Must be included for all subsequent submissions. It is 9 digits w/o leading zeros. Element can be repeated for multiple application numbers that apply. Put in with “pending” (case sensitive) if not known	102501123	repeatable
submission description		This element is used to link the application to the application number (in case of more than one application per eCTD Sequence).	The manufacturing of the finished product has been trans-	unique

<b>element</b>	<b>attribute</b>	<b>Description/Instruction</b>	<b>example</b>	<b>occurrence</b>
			ferred from A to B. As a consequence, some minor changes in the manufacturing process occur.	
invented name		The name of the medicinal product. Put in even if not yet definitive, put in with “pending” (case sensitive) only as a last choice.	wonderpill	repeatable
galenic form	name	Dosage form in English (EU standard terms strongly recommended) – lower case letters preferred	capsules	one per galenic form
galenic form	swiss- medic number (Market- ing Au- thorisa- tion num- ber)	The number assigned to the product identifying the product and its galenic form. This 5-digit-number is only assigned once a positive preliminary notice is issued. Put in with “pending” (case sensitive) if not known.	41962	one per galenic form
galenic form	galenic name	German, French or Italian term of the dosage form (EU standard terms strongly recommended) Please refer to App. 1, table 4, element No. 3.	Kapseln or capsules or capsule	one per galenic form
galenic name	language	Language of galenic name. Possible values are “de”, “fr”, “it”.	de	one per galenic name
dmf number		The number assigned to the DMF (alphanumeric). Put in with “pending” (case sensitive) if the assigned DMF number is not known. Put in with “n/a” (case sensitive) if the submission is not a DMF.	D3459	unique

<b>element</b>	<b>attribute</b>	<b>Description/Instruction</b>	<b>example</b>	<b>occurrence</b>
pmf number		The number assigned to the PMF. Put in with "pending" (case sensitive) if the assigned PMF number is not known. Put in with "n/a" (case sensitive) if the submission is not a PMF.	n/a	unique
inn		International Non-proprietary Name, used to identify pharmaceutical substances or active pharmaceutical ingredients. Each INN is a unique name that is globally recognized and is public property. Put in with "pending" (case sensitive) if not yet approved.	wonderdrug	repeatable
applicant		The name of the company submitting the eCTD. Put in with "n/a" (case sensitive) if the submission is a DMF or PMF.	Pharma SA	unique
dmf holder		The name of the company submitting the DMF. Put in with "n/a" (case sensitive) if the submission is not a DMF.	Farma SA	unique
pmf holder		The name of the company submitting the PMF. Put in with "n/a" (case sensitive) if the submission is not a PMF.	Farmos SA	unique
agency		Identification of the receiving agency: "Swissmedic" (case sensitive)	Swissmedic	unique

element	attribute	Description/Instruction	example	occurrence
application	type	<p>The type of procedure for the submission. The following are the valid values (bold text indicates the allowed values, case sensitive without blanks):</p> <p>na = new application, including:  <b>na-nas</b>: New Active Substance  <b>na-ngf</b>: New Galenic Form  <b>na-nko</b>: New Combination  <b>na-bws</b>: Known Active Substance  <b>na-gen</b>: Generics  <b>na-ie</b>: New Indication  <b>na-nde</b>: New Dosage Recommendation  <b>na-ndo</b>: New Dosage Strength</p> <p>notification = Variations requiring a notification procedure (submissions according to App. 8 of the Decree on Authorisation of Medicinal Products ("AMZV"))</p> <p>var-authorisation-scientific = Variation requiring authorisation incl. scientific review, follow-up measures quality, preclinical, clinical (submission description must be "follow-up measure")</p> <p>var-authorisation-admin = Variation requiring authorisation without scientific review</p> <p>renewal = Prolongation, renouncement of prolongation of Marketing Authorisation, notification of no marketing or interruption to distribution</p> <p>psur = Submission of PSUR</p>	na-ngf	repeatable

element	attribute	Description/Instruction	example	occurrence
		<p>pi = Parallel Import</p> <p>eas = Application for 5 years Data Protection</p> <p>co-marketing = Application for authorisation of a Co-Marketing Medicinal Product</p> <p>withdrawal = Withdrawal of authorised medicinal products</p> <p>var-pi = Variations requiring authorisation of the product information (Information for professionals, patient information)</p> <p>transfer = Transfer of a Marketing Authorisation, Change of name of applicant, change of address of applicant</p> <p>dmf = Drug Master File</p> <p>pmf = Plasma Master File</p> <p>orphan-fasttrack = Application for recognition of orphan drug status or fast track status</p> <p>reformat = A baseline eCTD submission containing no content change and which will not be subject to review</p> <p>supplemental-info = supplemental information (could include, for example, response to content validation issues or answers to question)</p>		

element	attribute	Description/Instruction	example	occurrence
		corrigendum = correction of errors detected in a sequence		
paragraph-13-tpa		Put in with “yes” (case sensitive) if the submission is according to paragraph 13 TPA and with “no” (case sensitive) if the submission is not according to paragraph 13 TPA (no other value than “yes” or “no” is allowed)	no	unique
eCTD Sequence		The Sequence number of the submission – this should start at 0000 for the first eCTD submission for the product and then increase incrementally with each subsequent submission, for example 0000, 0001, 0002 etc. (the increase should occur in chronological order). The Sequence number must have 4 digits.	0005	unique
related eCTD Sequence		The Sequence number of a previous submission to which this submission is related, e.g., the responses to questions to a new application. Put in the numeric value (must have 4 digits) or – in case there is no related sequence – put in “none” (case sensitive)	0003	repeatable

### Example of the use of the Related eCTD Sequence

A regulatory activity is a logical entity of submission activity (for example a new indication) with a defined start and end point (for example: initial submission to final approval). In the eCTD world, a regulatory activity consists of all the eCTD Sequences that together make up the lifecycle of that particular regulatory activity.

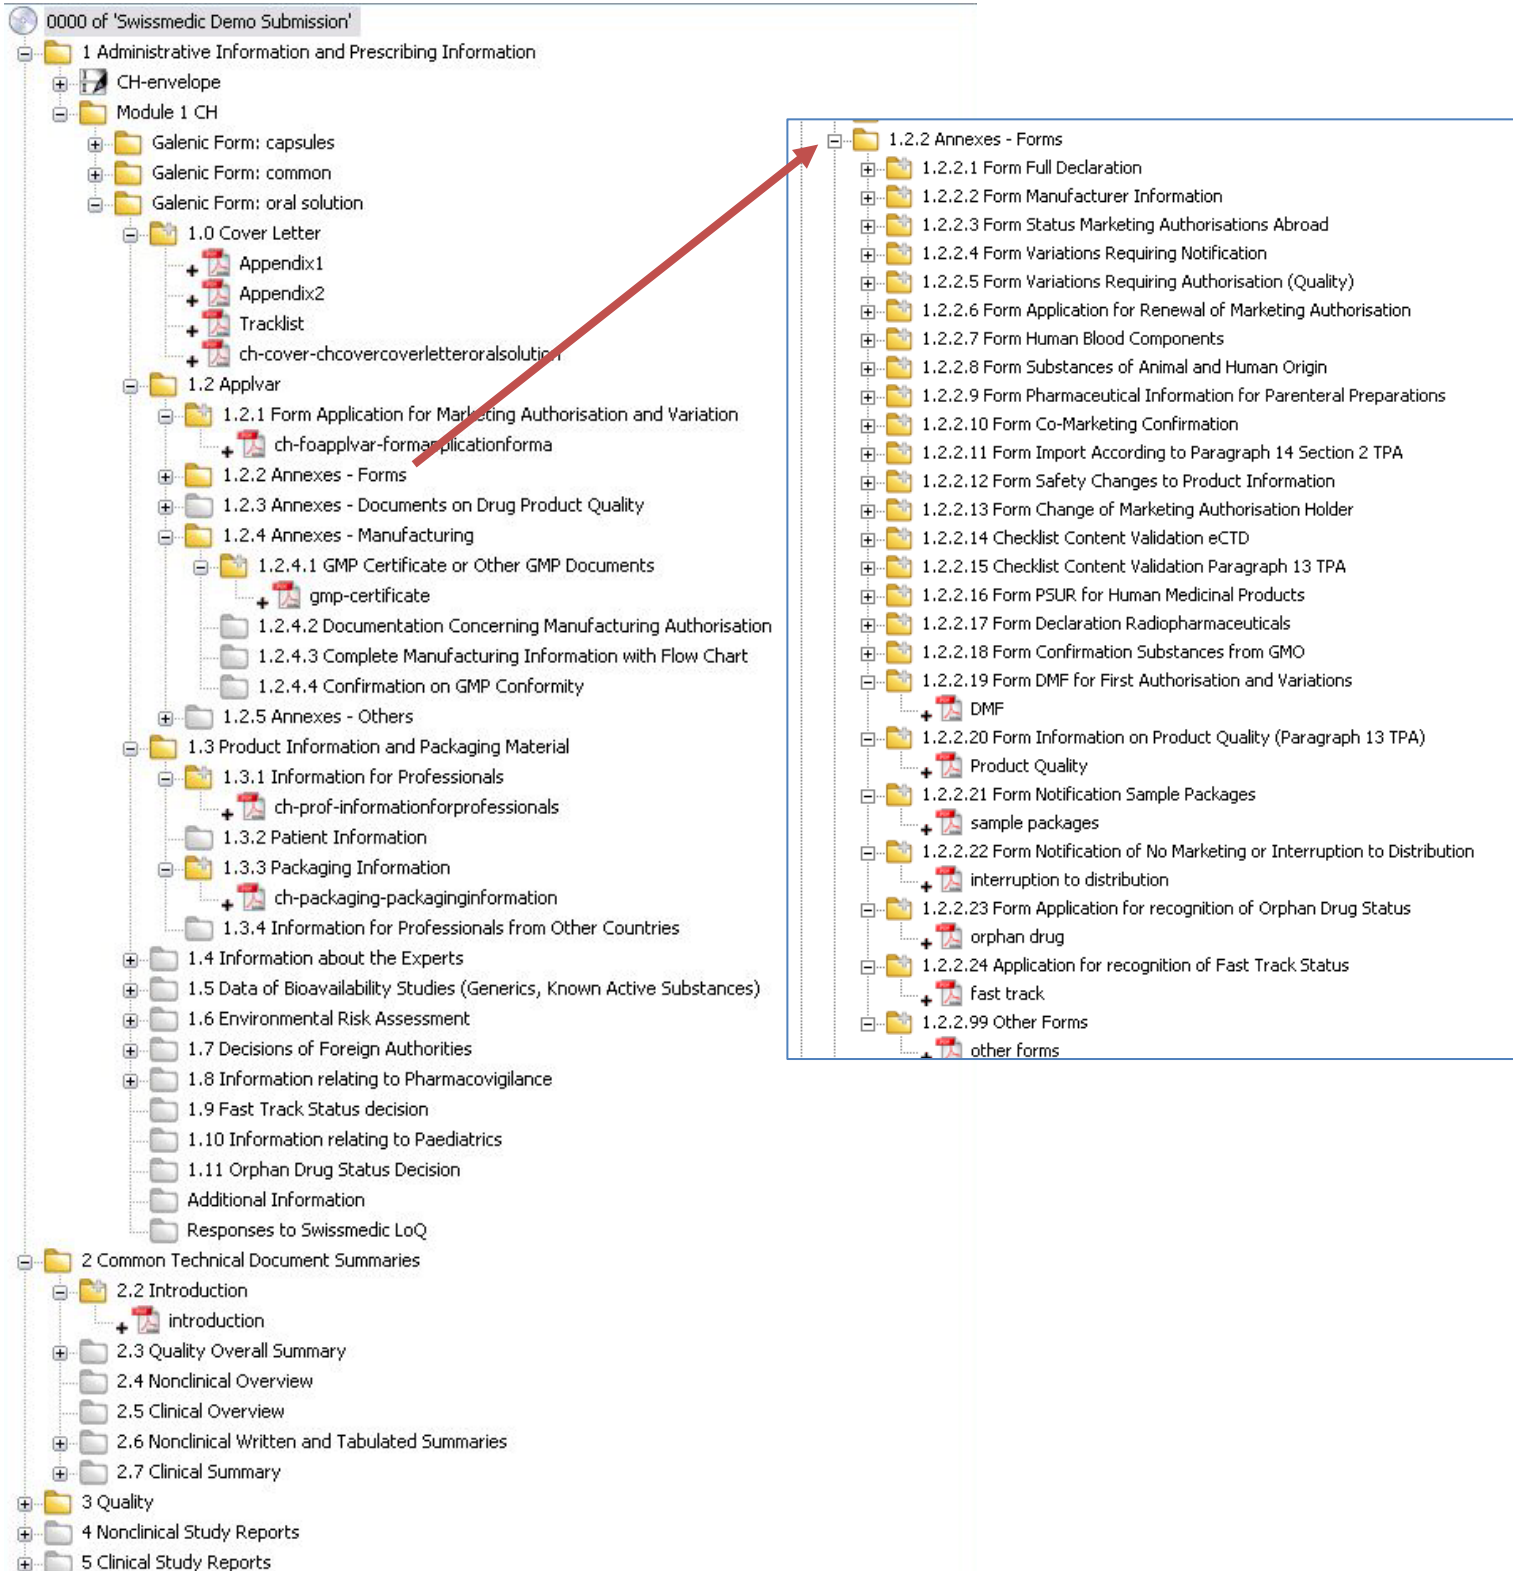

The related eCTD Sequence attribute should always be "none" for new applications or new regulatory activities (for example variations, PSURs). When submitting lifecycle eCTD Sequences within an existing activity, the related eCTD Sequence attribute should be populated with the eCTD Sequence number of the first eCTD Sequence in the activity, regardless of how many eCTD Sequences make up the activity. The related eCTD Sequence attribute should be considered independent of any modified file attributes in a submission. For example, if an eCTD Sequence 0010 modifies files (leaves) in eCTD Sequence 0008 and 0009, the entry for related eCTD Sequence in eCTD Sequence 0010 should be the eCTD Sequence number that started the regulatory activity that 0010 falls within, which will not necessarily be eCTD Sequence 0008 or 0009. See below for some illustrative examples.

eCTD Sequence	Submission description	Related eCTD Sequence	Type	Comment
0000	Original application	"none"	na-nas	
0001	Re-submission after negative content validation outcome	0000	supplemental-info	This is a continuation of the regulatory activity initiated in 0000 and so the related eCTD Sequence points to the beginning of that activity
0002	Answers to Questions	0000	supplemental-info	This is a continuation of the regulatory activity initiated in 0000 and so the related eCTD Sequence points to the beginning of that activity
0003	Application for a new indication (treatment of pain)	"none"	na-ie	This is the beginning of a new regulatory activity and so no related eCTD Sequence is included
0004	Application for a change in manufacturing site	"none"	var-authorisation-scientific	This is the beginning of a new regulatory activity and so no related eCTD Sequence is included
0005	Answers to Questions on application of a new indication for 'Treatment of Pain' indication	0003	supplemental-info	This is a continuation of the regulatory activity initiated in 0003 and so the related eCTD Sequence points to the beginning of that activity
0006	Answers to List of Questions for change in manufacturing site	0004	supplemental-info	This is a continuation of the regulatory activity initiated in 0004 and so the related eCTD Sequence points to the beginning of that activity
0007	Line extension to introduce a new dosage form (iv solution) that amends information provided in the original application and the manufacturing change variation	"none"	na-ngf	This is the beginning of a new regulatory activity and so no related eCTD Sequence is included

### Appendix 3: Example Screenshots

This appendix is included to demonstrate how the backbone is displayed using an XML viewing tool.

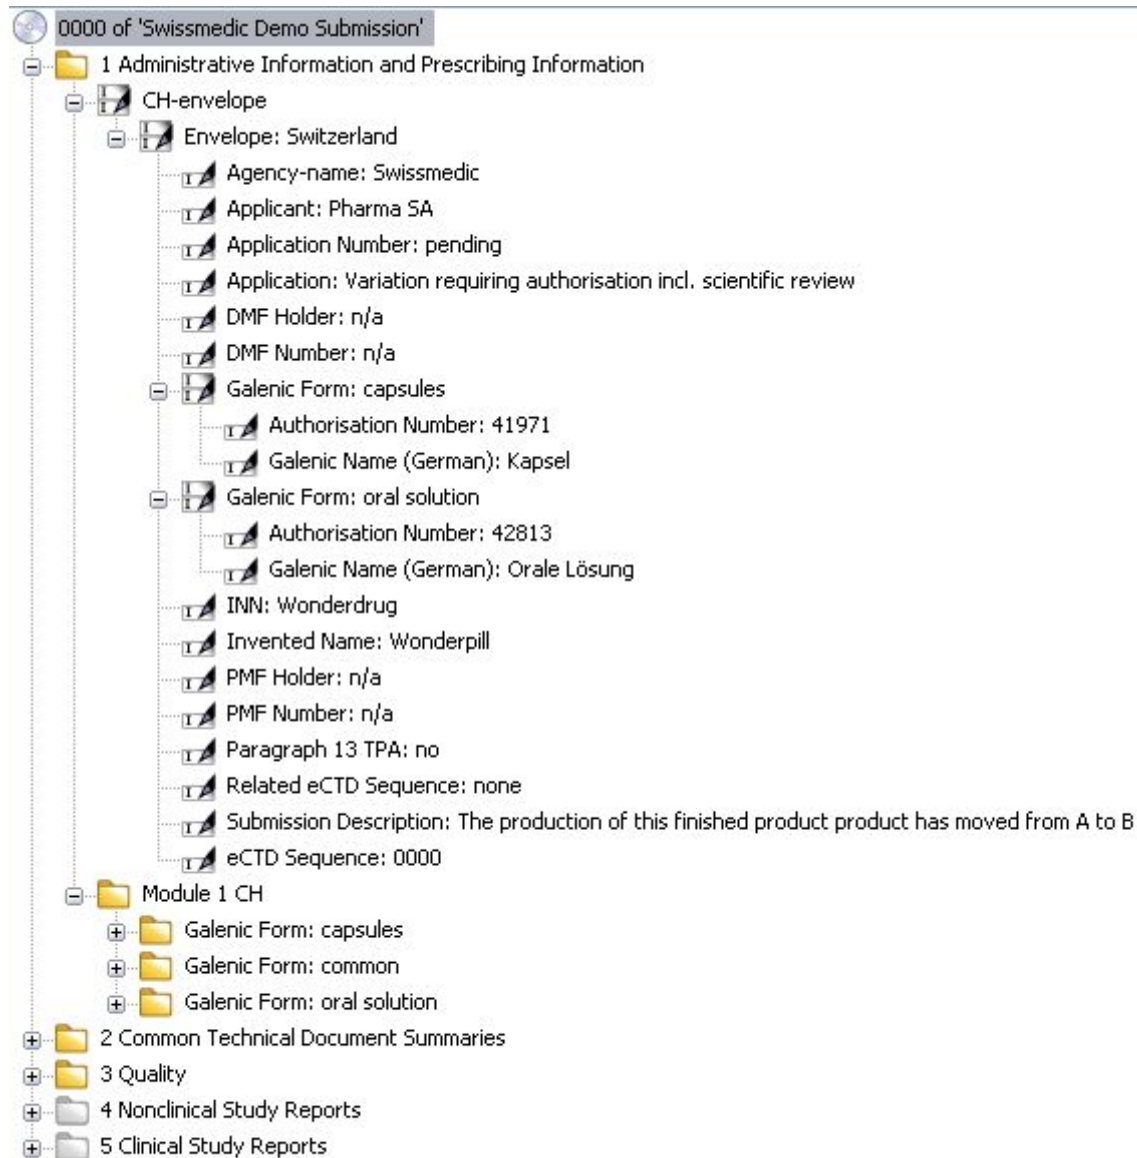

The screenshot displays an XML viewing tool interface for a submission titled '0000 of 'Swissmedic Demo Submission''. The tree structure is as follows:

- 1 Administrative Information and Prescribing Information
  - CH-envelope
  - Module 1 CH
    - Galenic Form: capsules
    - Galenic Form: common
    - Galenic Form: oral solution
    - 1.0 Cover Letter
      - Appendix1
      - Appendix2
      - Tracklist
      - ch-cover-chcovercoverletteroralsolution
    - 1.2 Applvar
      - 1.2.1 Form Application for Marketing Authorisation and Variation
        - ch-foapplvar-formapplicationforma
      - 1.2.2 Annexes - Forms (highlighted with a red arrow)
      - 1.2.3 Annexes - Documents on Drug Product Quality
      - 1.2.4 Annexes - Manufacturing
        - 1.2.4.1 GMP Certificate or Other GMP Documents
          - gmp-certificate
        - 1.2.4.2 Documentation Concerning Manufacturing Authorisation
        - 1.2.4.3 Complete Manufacturing Information with Flow Chart
        - 1.2.4.4 Confirmation on GMP Conformity
      - 1.2.5 Annexes - Others
    - 1.3 Product Information and Packaging Material
      - 1.3.1 Information for Professionals
        - ch-prof-informationforprofessionals
      - 1.3.2 Patient Information
      - 1.3.3 Packaging Information
        - ch-packaging-packaginginformation
      - 1.3.4 Information for Professionals from Other Countries
    - 1.4 Information about the Experts
    - 1.5 Data of Bioavailability Studies (Generics, Known Active Substances)
    - 1.6 Environmental Risk Assessment
    - 1.7 Decisions of Foreign Authorities
    - 1.8 Information relating to Pharmacovigilance
    - 1.9 Fast Track Status decision
    - 1.10 Information relating to Paediatrics
    - 1.11 Orphan Drug Status Decision
    - Additional Information
    - Responses to Swissmedic LoQ

- 2 Common Technical Document Summaries
- 2.2 Introduction
  - introduction
- 2.3 Quality Overall Summary
- 2.4 Nonclinical Overview
- 2.5 Clinical Overview
- 2.6 Nonclinical Written and Tabulated Summaries
- 2.7 Clinical Summary
- 3 Quality
- 4 Nonclinical Study Reports
- 5 Clinical Study Reports

## Structure of the Envelope using an XML viewing tool

### Appendix 4: Creating the XML Swiss Submission

The applicant chooses the name to be used for the top-level directory, as the Swissmedic number is not always known in advance and so cannot be used. The name given to the root directory is the decision of the applicant. However, the name must be a unique identifier for the application.

Details of the name used for the root directory should always be included in the cover letter. The new application and subsequent submissions should use the same top-level directory name. Each submission should be differentiated by a sub-directory named according to the eCTD Sequence number of the submission to Swissmedic. The application number (if available) and eCTD Sequence number should be included in the “ch-envelope” element of the Swiss Regional instance. The first sub-directory below the top-level directory for the original submission should have the eCTD Sequence number “0000” and e.g. the three subsequent submissions respectively “0001”, “0002” and “0003”.

## Appendix 5: Modularised DTD for CH Module 1
